UP-GRADE

Release all the potential of your wood floor

UP-GRADE

Shader for waterborne systems

- Enhance the naturalness of the wood
- Neutralize yellowing and eliminate undesired changes of colour
- Regulate the intensity according to the number of coats applied
- Versatile and suitable for all waterborne products (sealers and/or finishes)
- Easy to use
- Low environmental impact

VERMEISTER®
SOLUTIONS FOR WOOD FLOORS

UP-GRADE Shader for waterborne systems

Vermeister UP-GRADE is a special pre-dosed shader that can be added to any Vermeister waterborne products, sealer or top coat, single or two component, to lighten or darken the original color of the wood, eliminating unpleasant colour changes. Especially for oak and, in general, for all light coloured woods, UP-GRADE in its white version tends to neutralise yellowing and excess shading due to water soluble extractives naturally present in the wood. Each coat increases the toning effect and it is advisable to carry out a preliminary test to verify the final look. Available in the following shades: WHITE, GREY, BLACK, AMBER.

Convenient and Versatile

UP-GRADE is extremely easy to use. Each bottle is pre-dosed for a 1 gallon can of Vermeister waterborne sealer or finish so the ratio of use is not a problem; just pour the contents of the bottle into the can of treatment product that you normally use and shake well. The chemical-physical and mechanical characteristics of the product with the additive, remain unaltered and provide the floor with a true and proper “up-grade”.

Very eco-friendly

UP-GRADE, with its low odour impact and the absence of hazardous additives, guarantees a high standard of comfort living, confirming the low environmental impact typical of Vermeister products.

Technical notes

Quantity per can of sealer or finish* (g) *1 bottle for every gallon can	38
Stability and storage (in original, unopened containers stored in a cool, dry place) (months)	12
Standard packaging (Gal.)	0.01

Maintenance

Floors treated with products containing the UP-GRADE additive must only be maintained with DETERGENTE NEUTRO and/or IDRONET. Do not use alcohol, ammonia or cleansing products for hard surfaces.

UP-GRADE

Improve your wood floor.
